Experiment 11: Online Supermarket Management System

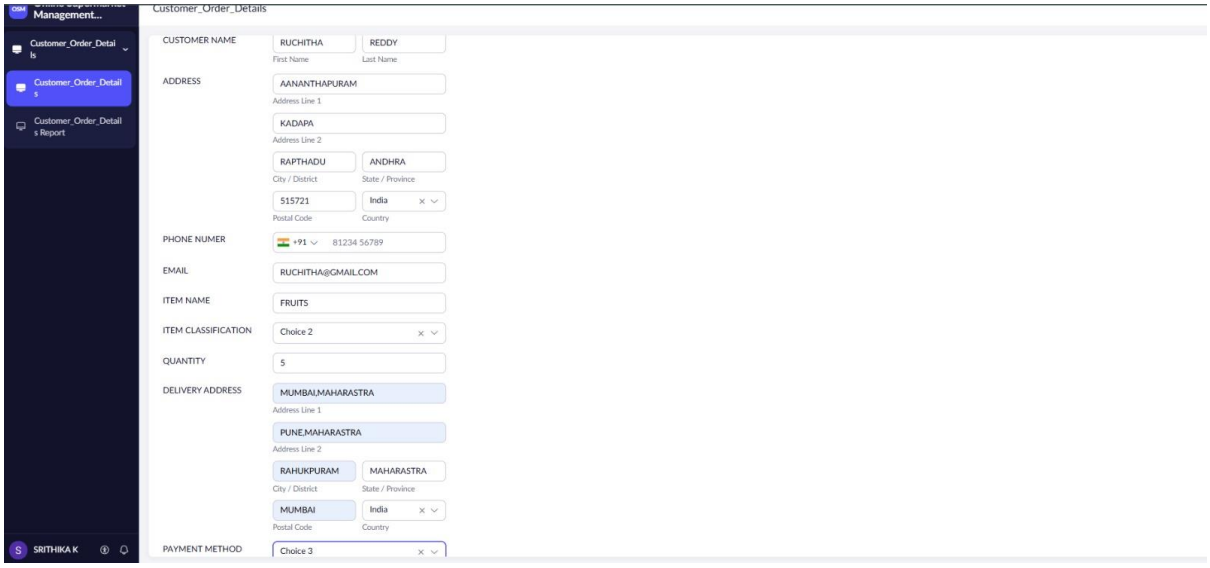

Aim

To create a cloud-based Online Supermarket Management System using Zoho Creator to manage customer details, orders, item quantities, and item classifications.

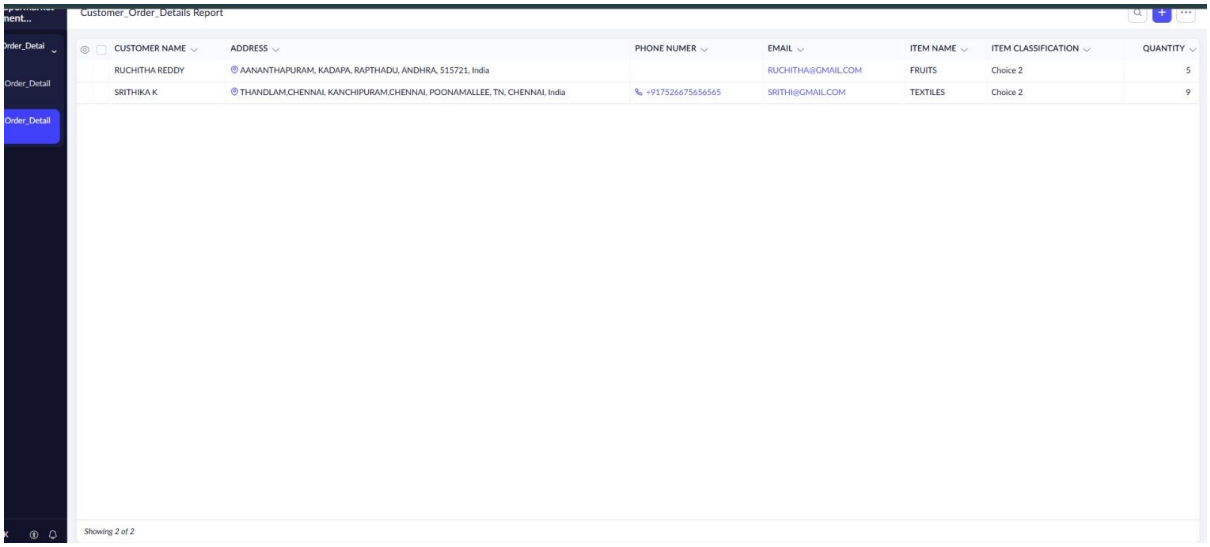

Procedure

- Open Zoho Creator and create a new application named Online Supermarket Management System.
- Create the Customer and Order Details form.
- Add fields such as customer name, address, phone number, email, item name, item classification, and quantity.
- Create an Item Classification form with item code, category, price, and available quantity.
- Save the forms and enter sample data.
- View the submitted records using the application reports.

Input

Output

Result

A cloud-based Online Supermarket Management System was created using Zoho Creator to demonstrate Software as a Service (SaaS).
