Experiment 3: Car Booking Reservation System Using Cloud Computing (SaaS)

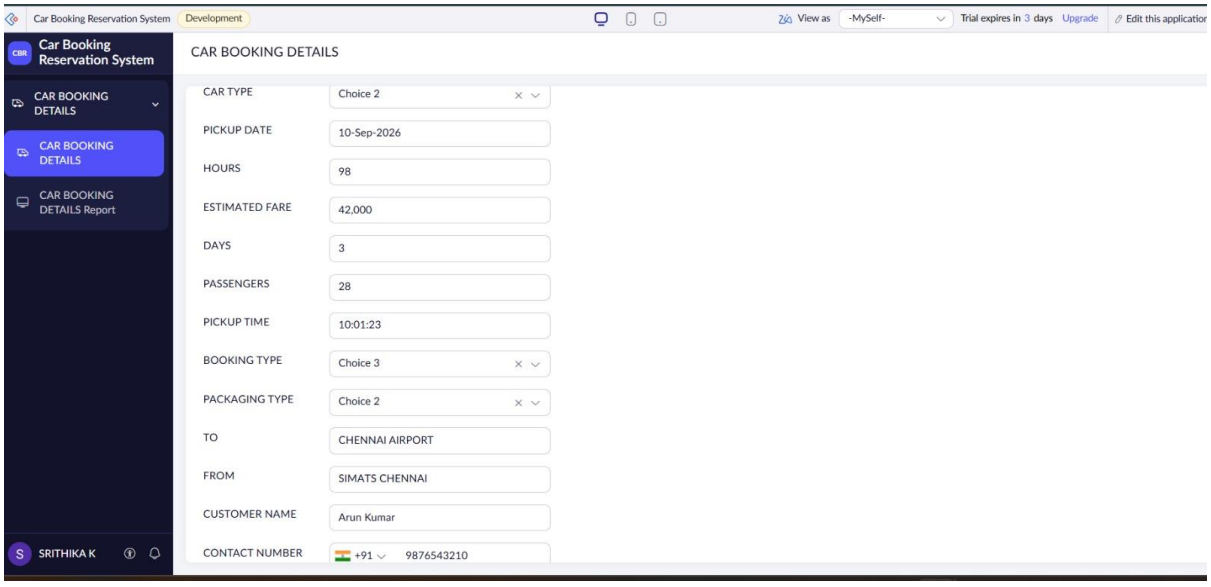

Aim

To create a simple cloud-based Car Booking Reservation System using a Cloud Service Provider to demonstrate Software as a Service (SaaS).

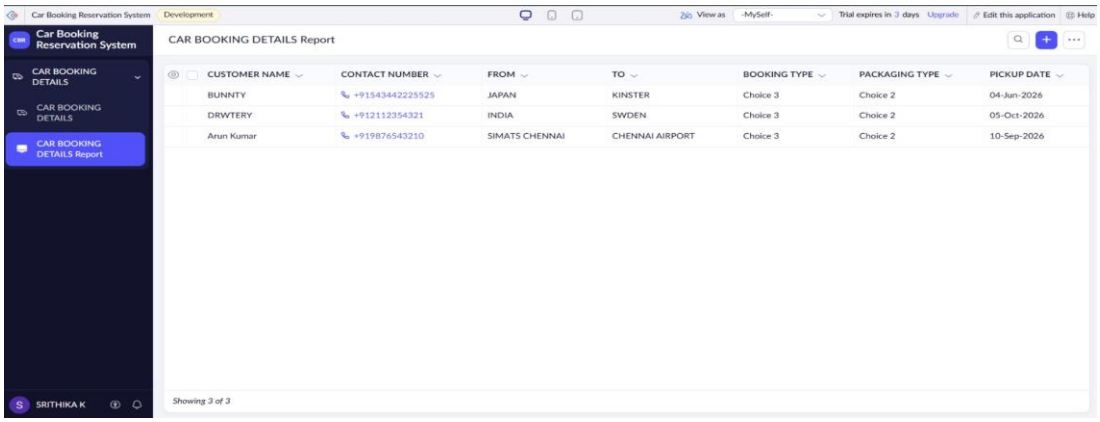

Procedure

1. Open a cloud application development platform such as Google AppSheet.
2. Create a new application named Car Booking Reservation System.
3. Design a booking form to collect customer and journey details.
4. Add fields such as Search for Cabs, From, To, Rental, Outstation, Package Type, Hours, Days, Travel Date, and Number of Passengers.
5. Add sample booking details for a journey.
6. Configure the application to store and display the reservation information.
7. Save and test the application using sample input values.
8. Access the application through the internet to demonstrate SaaS.

Input

Output

Result

Thus, a simple cloud-based Car Booking Reservation System was designed to demonstrate Software as a Service (SaaS).
