Experiment 6 : Payroll Processing System Using Cloud Computing (SaaS)

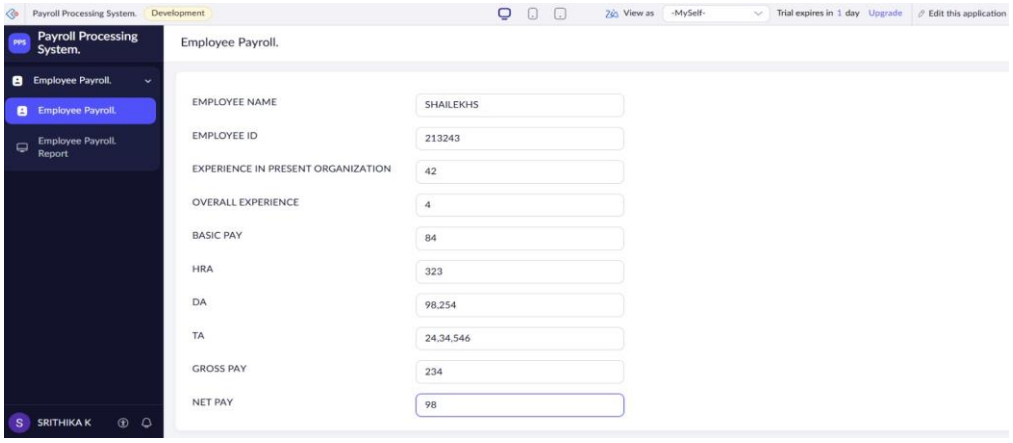

Aim

To create a cloud-based Payroll Processing System using Zoho Creator to store employee details and calculate gross pay and net pay.

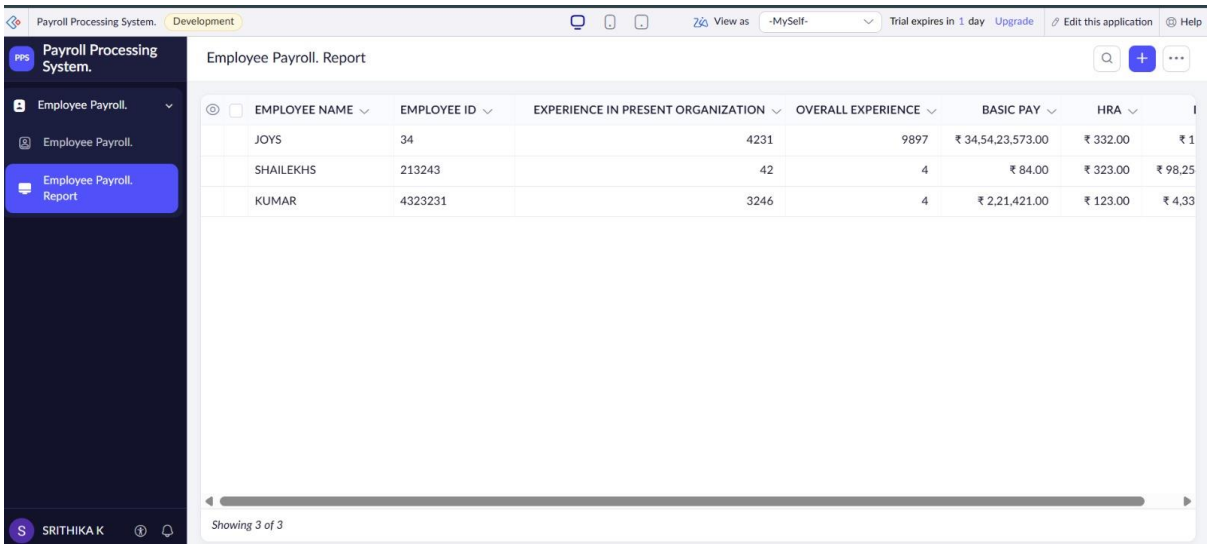

Procedure

- Open Zoho Creator and sign in.
- Create a new application named Payroll Processing System.
- Create an Employee Payroll form.
- Add fields such as Employee Name, Employee ID, Present Organization Experience, Overall Experience, Basic Pay, HRA, DA, TA, Gross Pay and Net Pay.
- Create a workflow using Deluge script to calculate gross pay.
- Enter sample employee details and salary information.
- Submit the form and verify the employee records and salary details.

Input

Output

Result

Thus, a cloud-based Payroll Processing System was created using Zoho Creator to store employee details and demonstrate SaaS.
