Experiment 14: Create a Virtual Hard Disk and allocate the storage using VM ware Workstation

Aim

To create a virtual hard disk and allocate storage space to a virtual machine using VMware Workstation

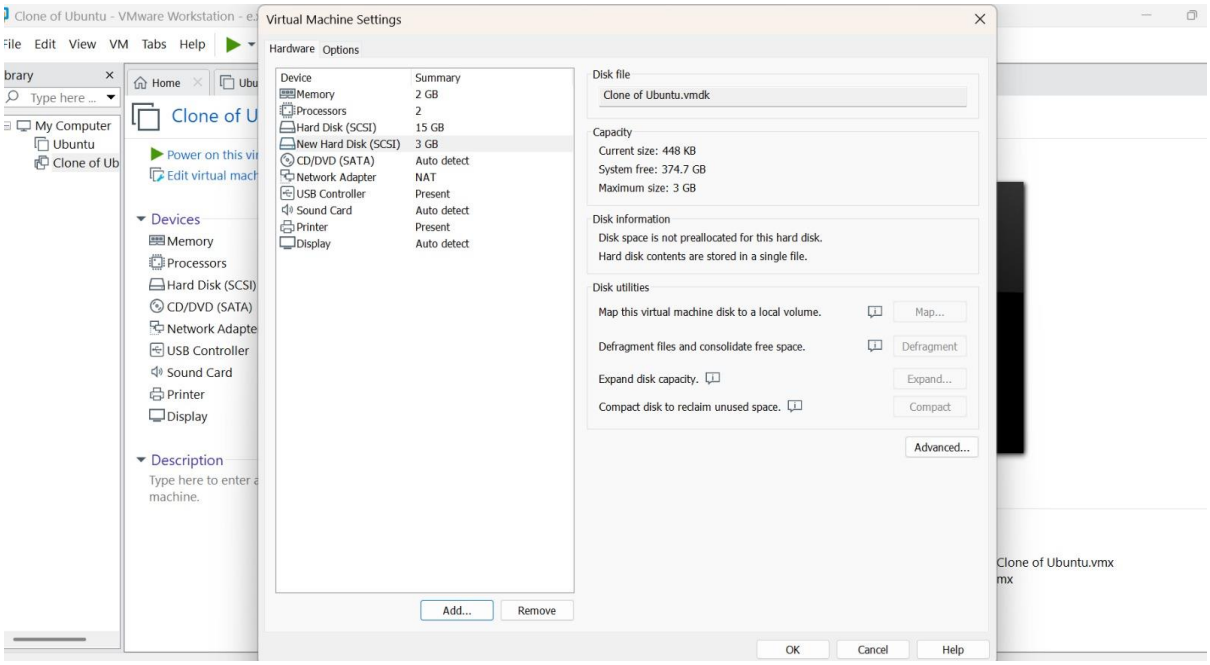

Procedure

- Open VMware Workstation.
- Click Create a New Virtual Machine.
- Select Typical (recommended) and click Next.
- Select I will install the operating system later.
- Choose the Guest Operating System (Linux or Windows).
- Enter the Virtual Machine name.
- Specify the disk capacity (e.g., 15 GB).
- Select Store virtual disk as a single file or Split virtual disk into multiple files.
- Click Next.
- Click Finish to create the virtual machine with its virtual hard disk.

Input

Parameter	Value
Software	VMware Workstation
Disk type	Virtual Hard Disk
Disk capa	15 GB
Disk format	VMDK
Allocation	Dynamically growing
Host OS	Windows 11

Output

Result

Thus, a virtual hard disk was created and storage space was allocated successfully using VMware Workstation.
