Experiment 1: Flight Reservation System Using Zoho Creator

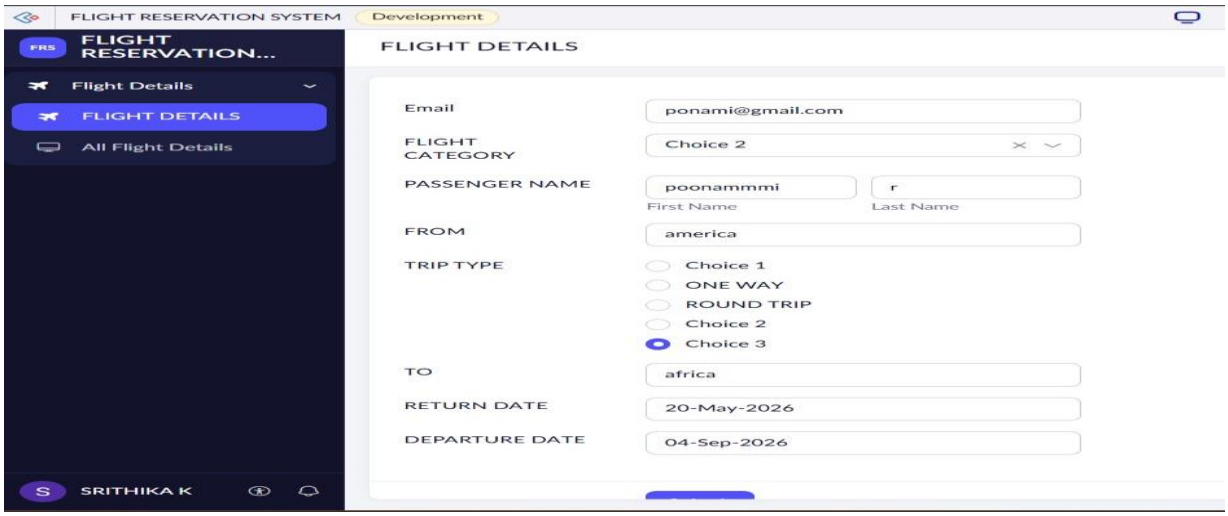

Aim

To create a simple cloud-based Flight Reservation System using Zoho Creator to demonstrate Software as a Service (SaaS), including one-way and round-trip bookings, domestic and international flights, departure dates, travellers, class, and fare type.

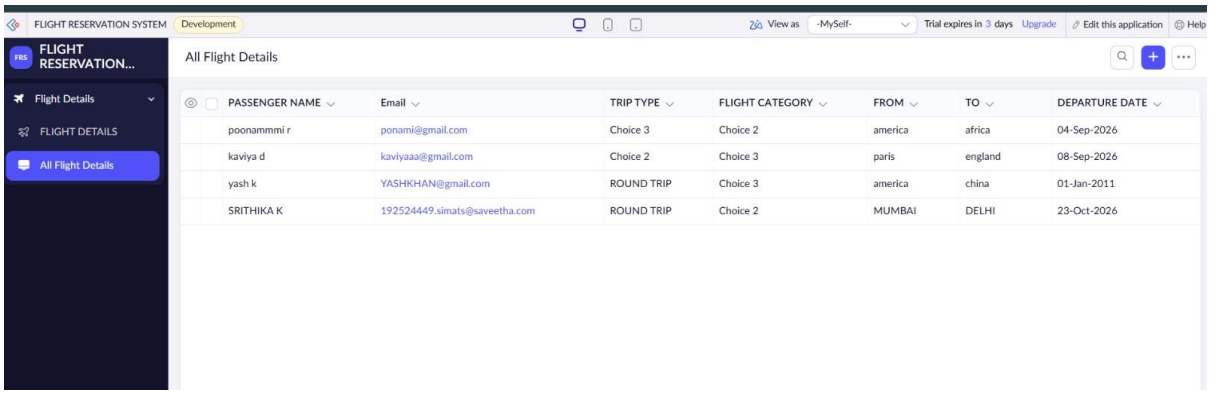

Procedure

1. Open and sign in to Zoho Creator.
2. Create a new application named **Flight Reservation System**.
3. Create a form named **Flight Details**.
4. Add the fields Passenger Name, Email Address, Trip Type, Flight Category, From, To, Departure Date, Return Date, Travellers, Class, and Fare Type.
5. Configure Trip Type with the options One Way and Round Trip.
6. Configure Flight Category with Domestic and International.
7. Configure Class with Economy, Premium Economy, Business, and First Class.
8. Configure Fare Type with Regular, Student, Senior Citizen, and Armed Forces.
9. Save the form and open the preview.
10. Enter sample flight details and submit the form.
11. Verify the submitted details in the application report.

Input

Output

Result

Thus, a simple cloud-based Flight Reservation System was created using Zoho Creator to demonstrate the SaaS model by collecting and displaying flight reservation details through a web-based application.
